Thank you for purchasing Giant's Neos Sync Digital Wireless Computer. For your safety, we recommend that you look straight ahead while riding. Avoid staring at the computer screen. This may compromise your awareness, leading to a serious accident.

Ensure that the head unit has been paired with the speed sensor before using your computer.

If you have any questions or problems, please contact your local Giant dealer or go to Giant's official website:
www.giant-bicycle.com

Let's go ride!

Package contents

Head Unit

Straps

Base Unit

Sensor Unit

The Neos sync comes with one head unit and three accessories

- 1.Head unit
- 2.Charging cable
- 3.Base and handlebar extension
- 4.Rubber straps
- 5.Speed and cadence sensor
- 6.Speed sensor battery
- 7.Speed sensor magnet
- 8.Cadence sensor magnet
- 9.Zip ties

Installation instructions

3

Mounting

Locations of Components

The head unit can be mounted in three different locations:

- (A) Stem
- (B) Handlebar
- (C) Handlebar extension

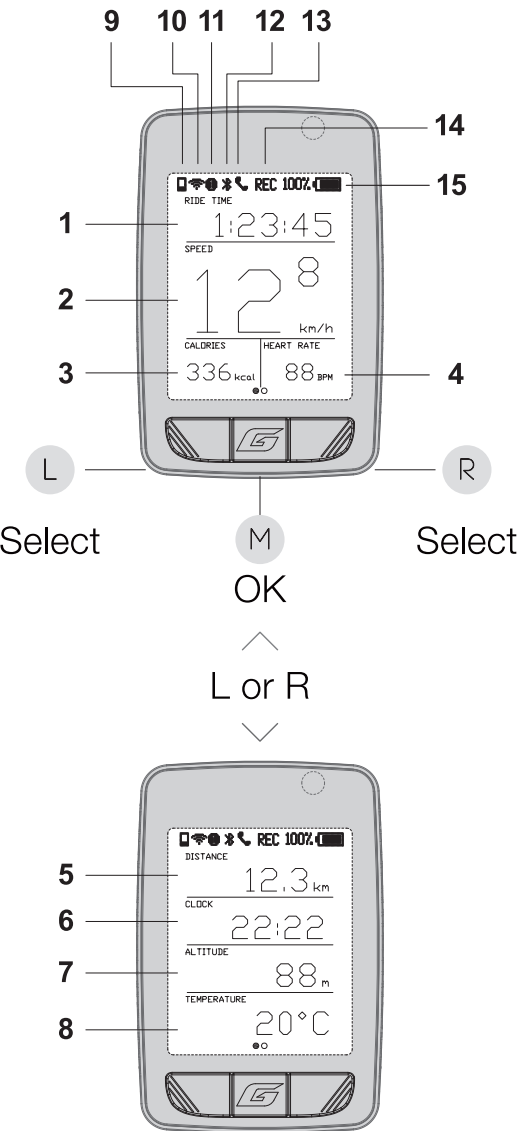

Mount the speed and cadence sensor to the non-drive chainstay with zip ties, as shown. Mount the speed sensor magnet to a spoke and the cadence sensor to the non-drive crankarm. Ensure each magnet passes within 5 mm of the its respective speed and cadence sensor.

Charging

Note: Speed and cadence sensor will not function if the distance between the magnet

Display & buttons

Default Functions

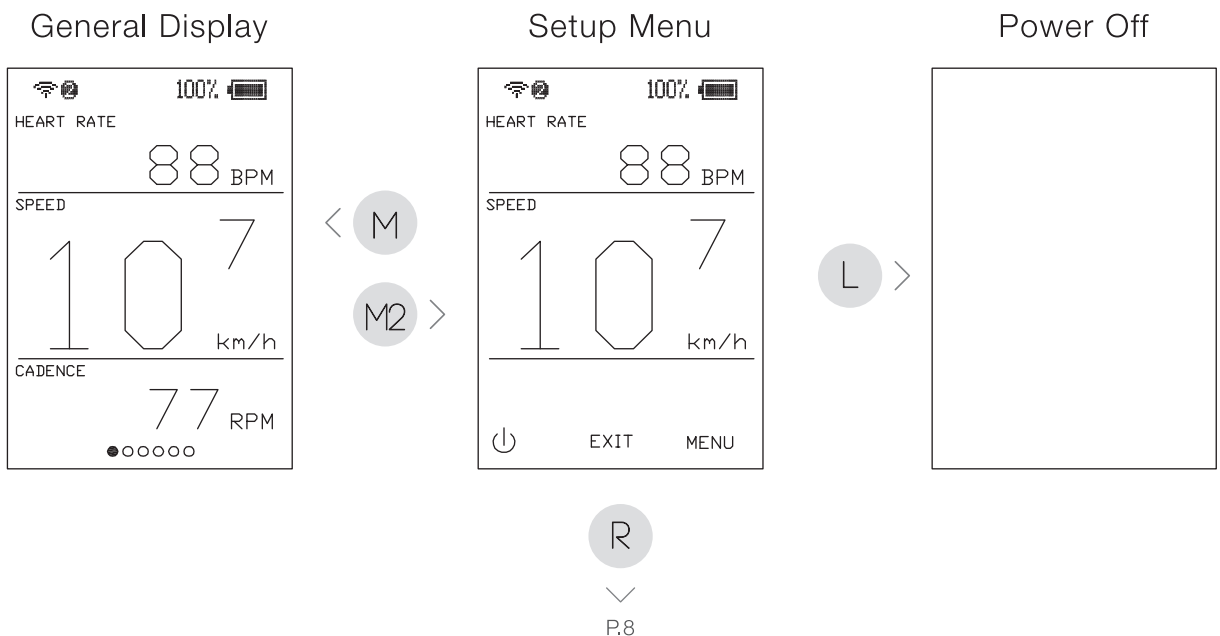

| | |
|-----------------------|--|
| 1. RIDE TIME | Trip ride time |
| 2. SPEED | Current speed |
| 3. CADENCE | Current cadence |
| 4. HEART RATE | Current heart rate |
| 5. DISTANCE | Trip distance |
| 6. CLOCK | Current time |
| 7. ALTITUDE | Current altitude |
| 8. TEMPERATURE | Current temperature |
| 9. Phone Mode | Displays while in phone mode |
| 10. Wireless Signal | Displays when signal is received from sensor |
| 11. Bike Selection | Bike Selection |
| 12. Bluetooth | Displays while a phone is connected |
| 13. Incoming Call | Incoming Call |
| 14. REC | Recording ride data |
| 15. Battery Indicator | Shows remaining |

Other Functions

| | |
|---------------|--------------------------------|
| ODO | Odometer |
| TOT Ride Time | Total riding time |
| TOT Calories | Total calories burnt |
| Power | Current power |
| Max Power | Maximum power |
| Ave Power | Average power |
| Max Speed | Maximum speed |
| Ave Speed | Average speed |
| Max CAD | Maximum cadence |
| Ave CAD | Average cadence |
| Max HR | Maximum heart rate |
| Ave HR | Average heart rate |
| Gradient % | Current slope |
| Altitude Gain | Cumulative ascending distance |
| Altitude Loss | Cumulative descending distance |

| | |
|---|---|
| Max Altitude | Maximum altitude |
| Max Ascent % | Maximum uphill slope |
| Ave Ascent % | Average uphill slope |
| Max Descent % | Maximum downhill slope |
| Ave Descent % | Average downhill slope |
| L, M, R: Press the respective key and release L2, M2, R2: Press the respective key for 2 seconds and release | L: Select function M: Confirm selection R: Select function L2: Select Bike1/2 M2: Enter the quick menu R2: Reset trip logs |
| AC | AC Reset the computer to factory default settings. |

Press M2 key in general display mode to enter the quick menu:

- L: Press the L key to power off
- M: Press the M key to exit the quick menu
- R: Press the R key to enter the setup menu

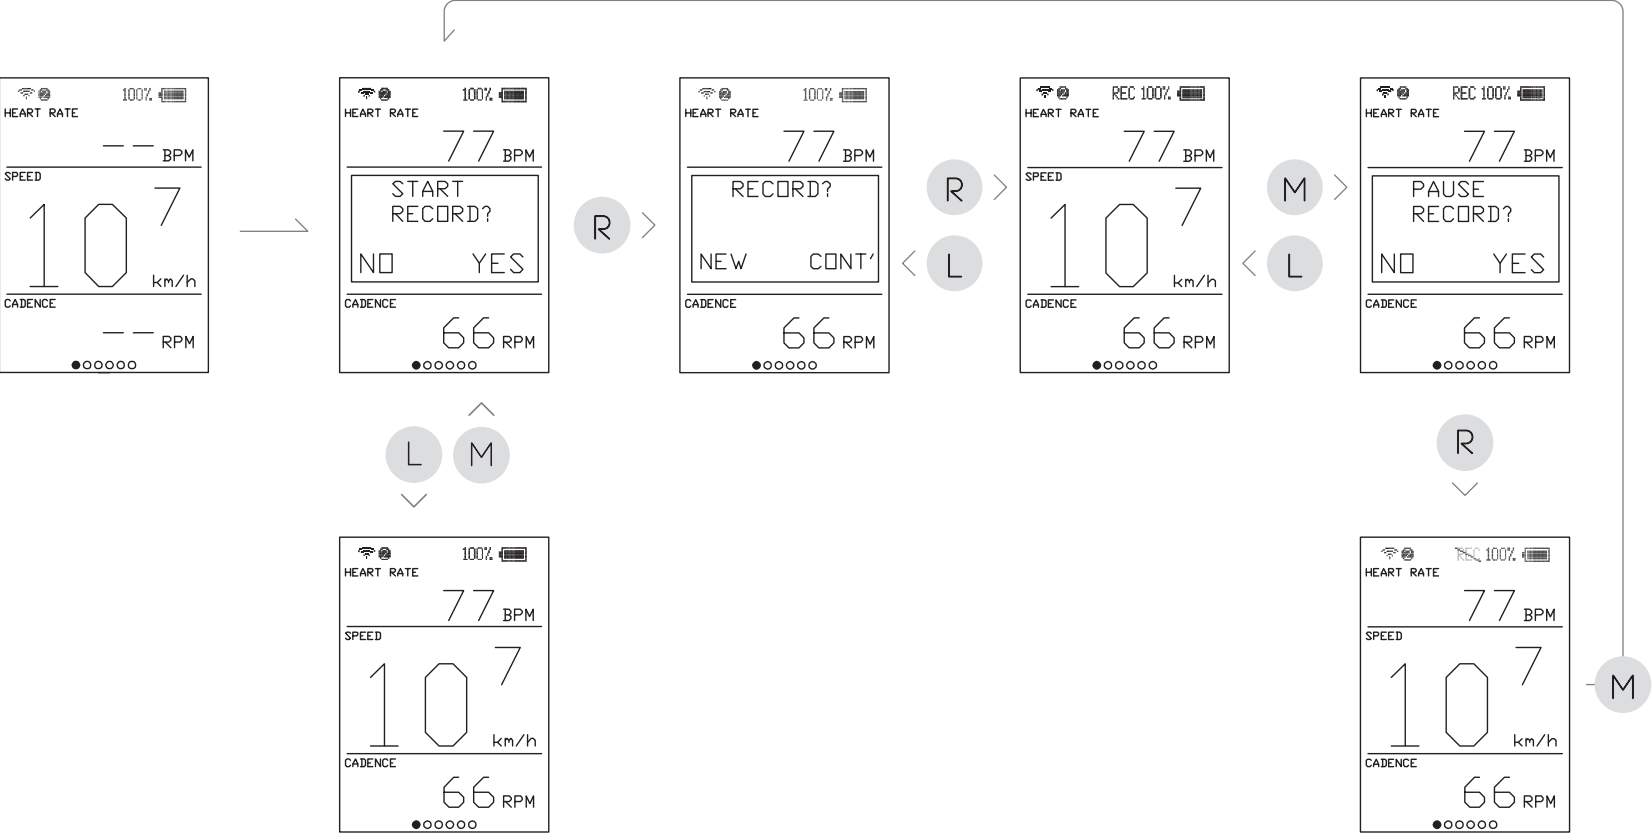

Auto Backlight

Auto Backlight:
The computer has a light detector which automatically turns on the backlight in dim light.

*The computer must be installed on the base to enable this function.

Start Riding

The computer prompts you to start recording ride data when a signal is received from the speed sensor. Press the R key to record, press the L key to ignore.

After pressing the R key, the computer prompts you to start a new ride log or to continue recording an existing ride log. Press the R key to continue an existing log, press the L key to start a new ride log.

If the M key is pressed during a ride, the computer prompts you to pause data recording. Press the R key to pause, press L key to continue recording.

Incoming Call

Unanswered Call

Incoming Call:
The computer displays an incoming call alert when call is received while riding. Press any key to close the alert and go back to the ride page.

Unanswered Call:
The computer displays a missed call alert if an incoming call is not answered. Press any key to close the alert and go back to the ride page.

*The incoming call and unanswered call alerts will only be displayed after the computer has been paired with your smartphone.

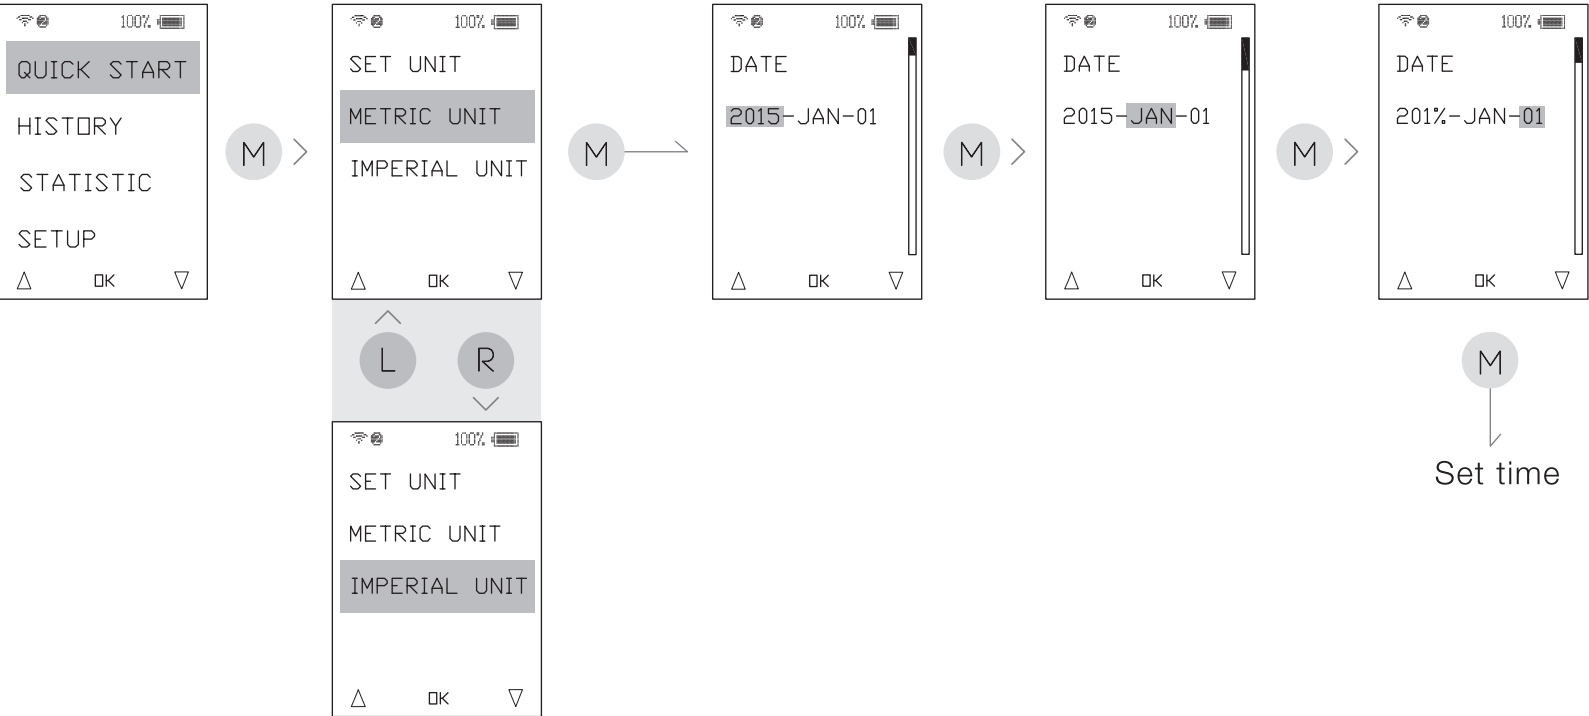

Press the M2 key to enter the quick menu.
Press the L or R key to enter to select quick start. Press the M key to confirm and enter units setup.

Set Units

Set Date

After entering units setup, press the L or R key to select either metric or imperial units. Press the M key to confirm and move to time setup.

Set time

After entering time setup, press the L or R key to select either 12 or 24 hour format.
Press the M key to confirm and move to wheel size setup.

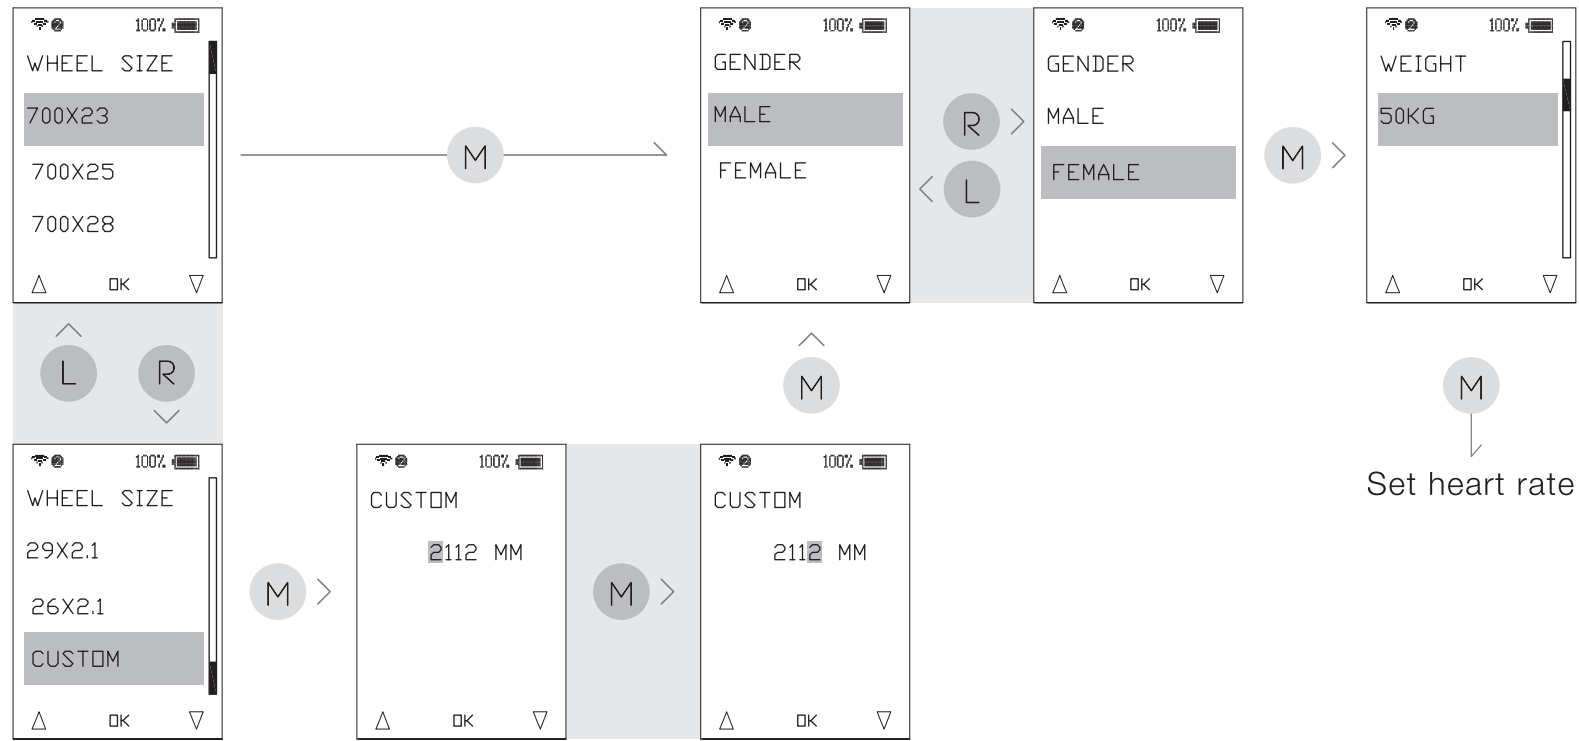

Quick setup

After entering wheel size setup, press the L or R key to select from ten pre-programmed wheel sizes. Press the M key to confirm and move to gender and weight setup mode. If wheel size is not shown, select custom and enter your measured wheel circumference. Press the M key to confirm and move to gender and weight setup.

After entering gender setup, press the L or R key to select either MALE or FEMALE. Press the M key to confirm and move to weight setup.

After entering weight setup, press the L or R key to select your weight. Press the M key to confirm and move to heart rate setup.

Set Wheel Size Set Gender & Weight

*Same as Bike2 setting

Set Trip Logs

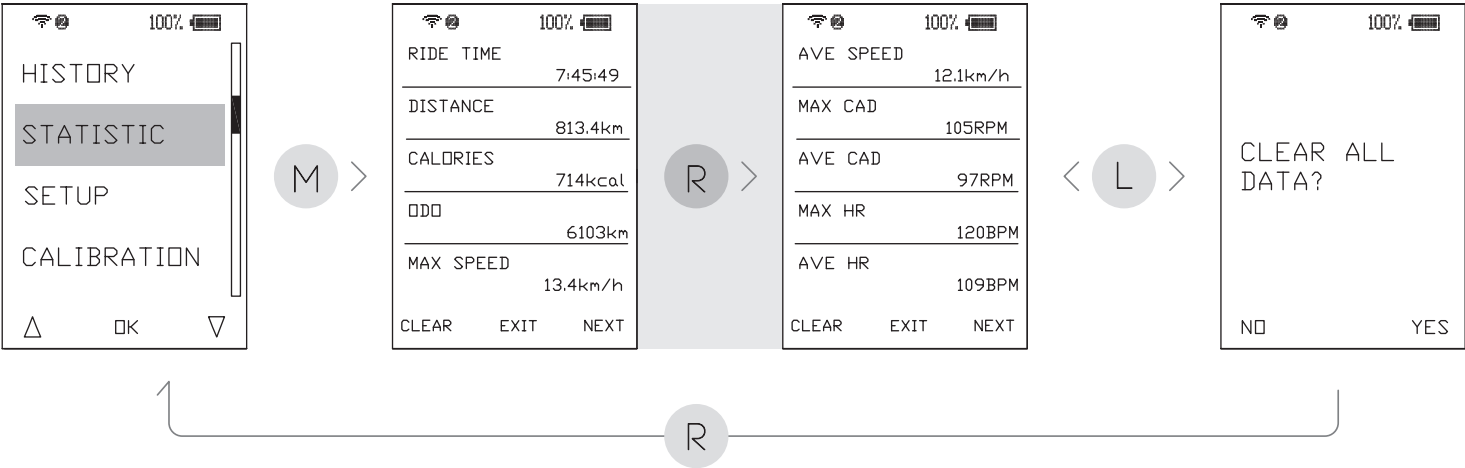

After entering the quick menu, press L or R key to select history. Press the M key to confirm. Press the L or R key to select the ride date. Press the M key to confirm and enter the trip log display page.

After entering the trip log display page, press the R key to go to the next page. Press the L key to delete the current record. Press the M key to exit to the quick menu.

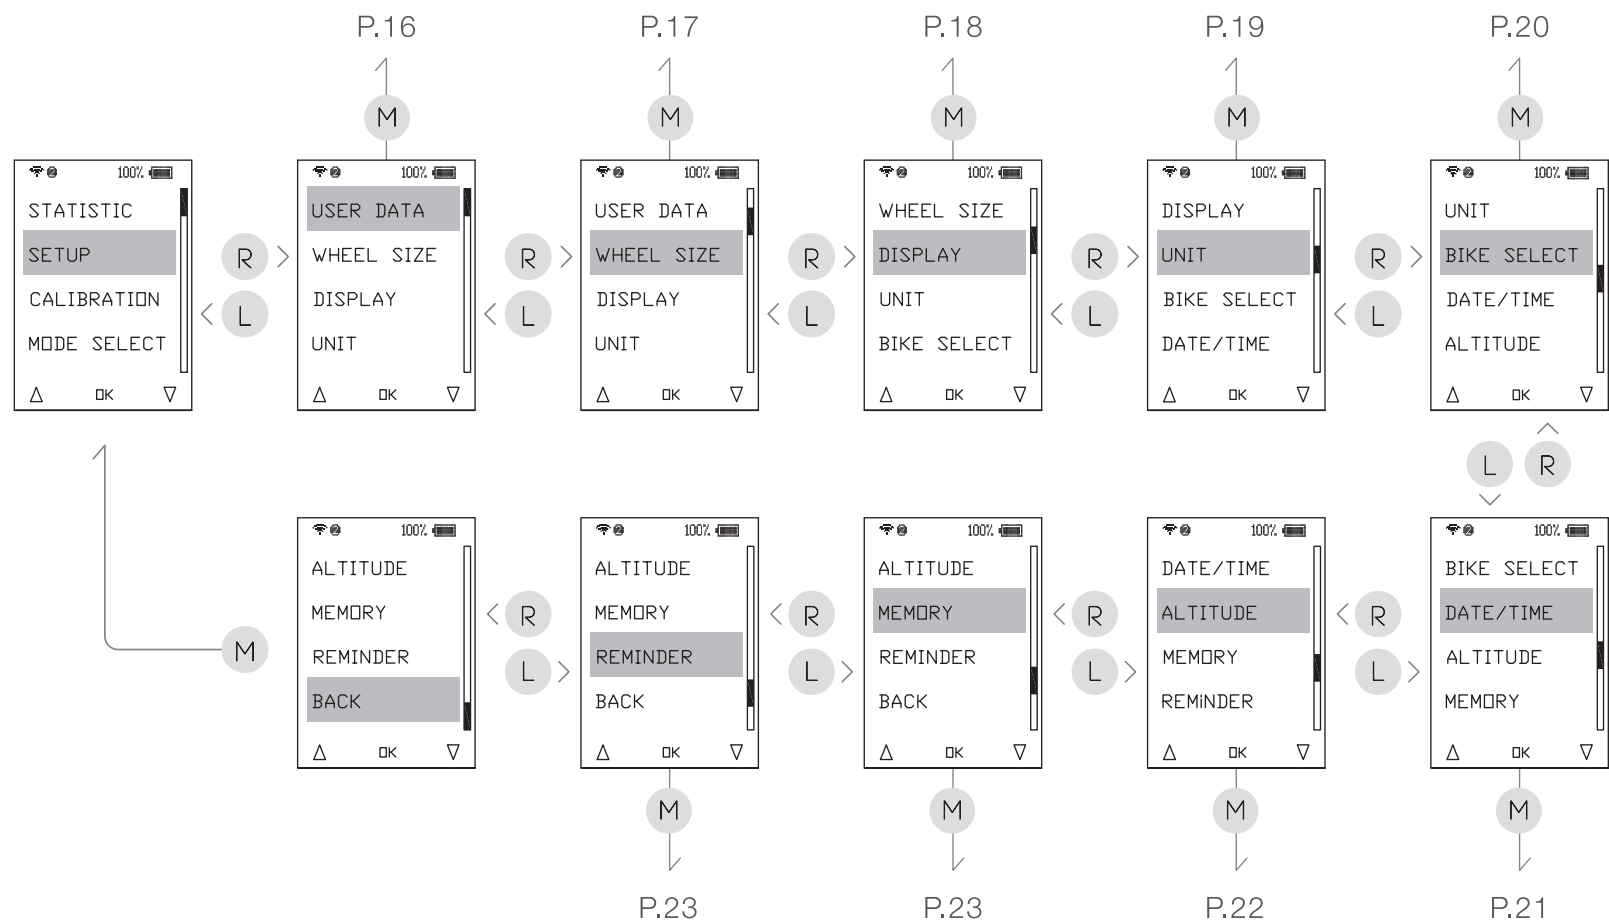

Set Log Overview

After entering the quick menu, press L or R key to select statistics. Press the M key to confirm and enter the statistics page. Data shown in the statistics page are all cumulative.

After entering the statistics page, press the R key to go to the next page. Press the L key to delete all cumulative data. Press the M key to exit to the quick menu.

Set Options

After entering the quick menu, press the L or R key to select setup. Press the M key to confirm and move to the setup menu.

- User data (P.16)→
- Wheel size (P.17)→
- Riding page display (P.18) →
- Unit (P.19) →
- Bike Selection (P.20) →
- Date and time (P.21) →
- Altitude (P.22)→
- Memory data (P.23) →
- Maintenance alert (P.23) → Exit.

User data

After entering the setup menu, press L or R key to select user data. Press the M key to confirm and move to user data setup.

After entering user data setup, press the L or R key to select male or female. Press the M key to confirm. Proceed with weight and heart rate setup as outlined in their respective previous sections. Press the M key to exit to the setup menu.

Wheel size

After entering the setup menu, press the L or R key to select wheel size. Press the M key to confirm and move to wheel size setup.

After entering wheel size setup, press L or R key to select from ten pre-programmed wheel sizes. If wheel size is not shown, enter a measured wheel circumference.

Press the M key to confirm and exit to the setup menu.

Set Ride Page Display

After entering the setup menu, press L or R key to select display. Press the M key to confirm and move to display setup.

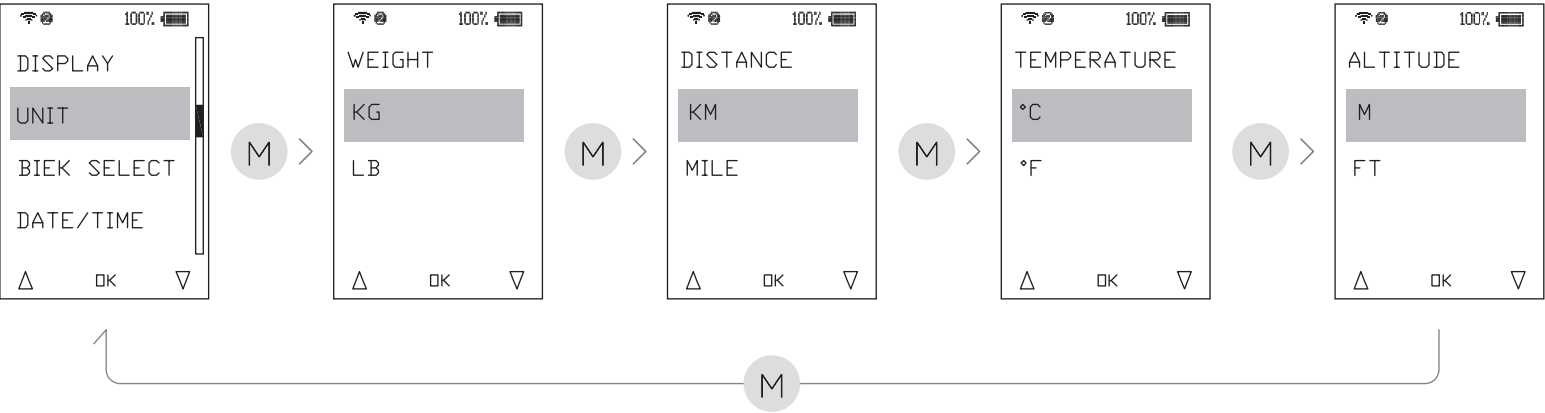

After entering display setup, press the L or R key to select the number of cells to display on the custom ride page. Press the M key to confirm. Proceed with function settings, press M key to confirm. press L key to reset the page. Press R key to add a new page.

*You may set up to 6 pages. The first page can be customized; all other pages are set to 4 cells.

Set Units

After entering the setup menu, press the L or R key to select unit. Press the M key to confirm and move to unit setup.

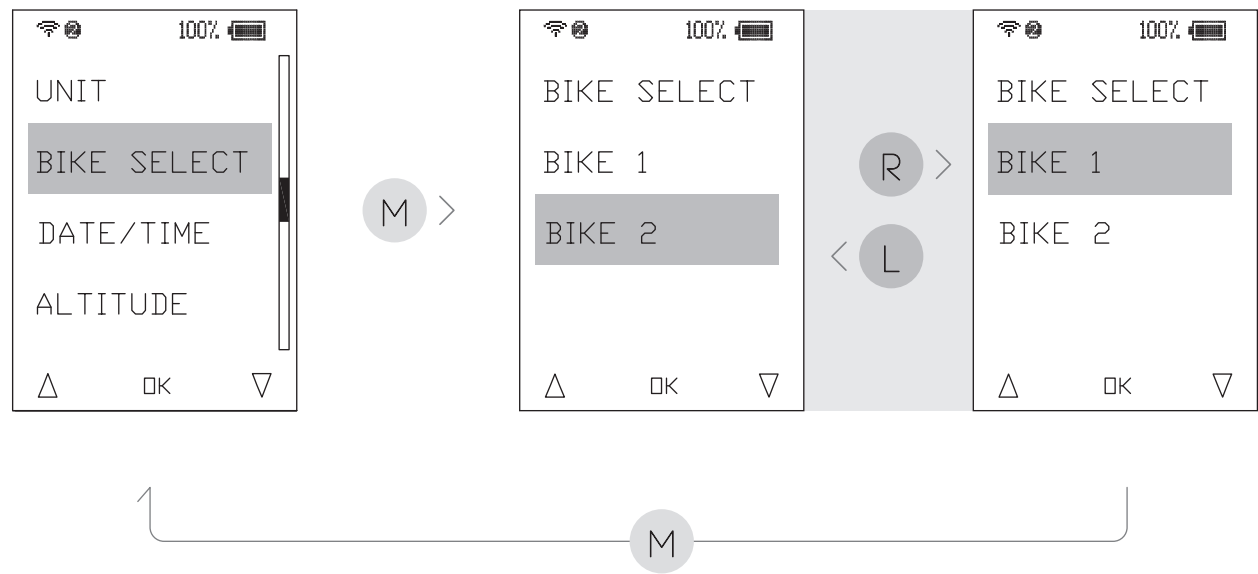

After entering unit setup, press the L or R key to select kilograms or pounds. Press the M key to confirm. Proceed with setting kilometers or miles, celsius or fahrenheit, and meters or feet. Press the M key to confirm and exit to the setup menu.

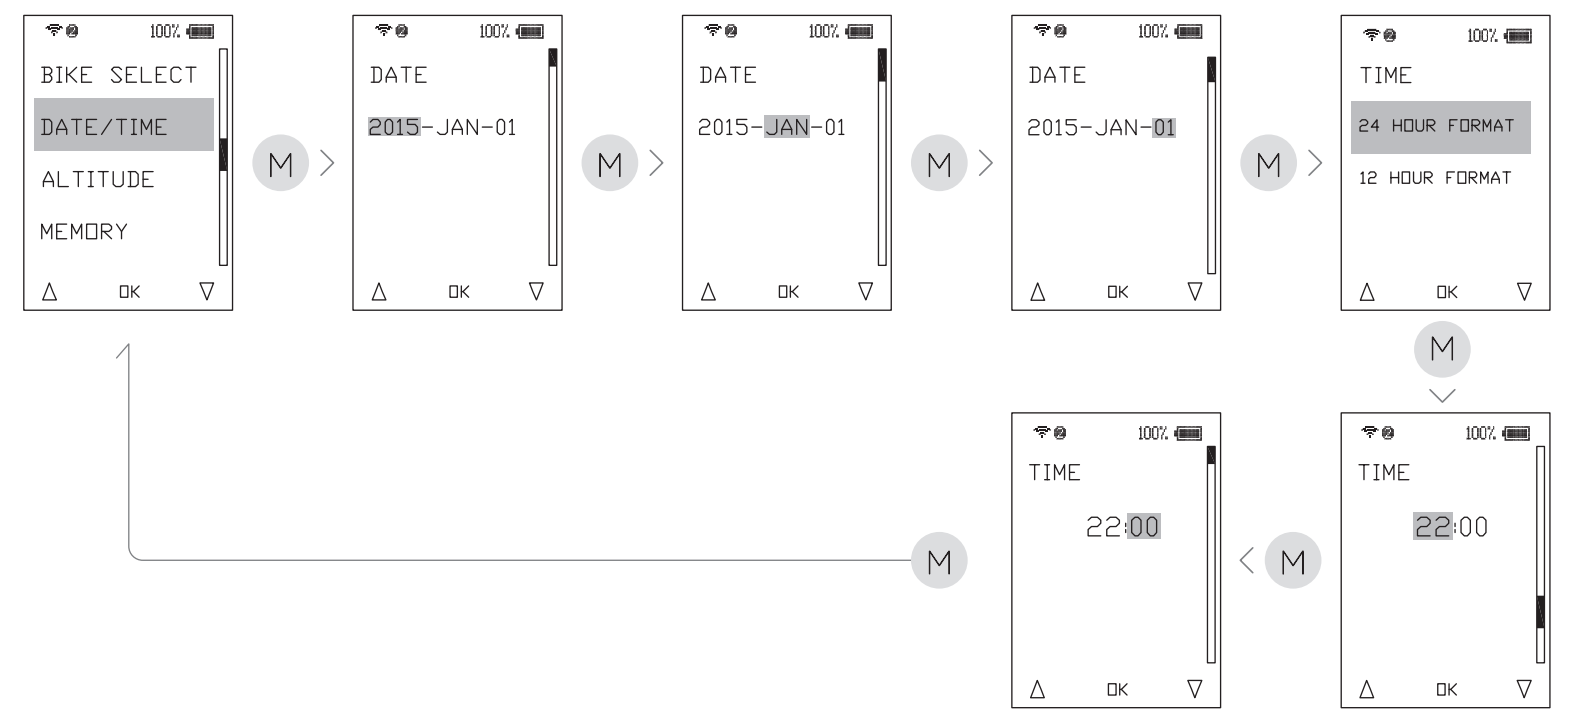

Bike Selection

After entering the setup menu, press the L or R key to select bike select. Press the M key to confirm and move to bike select.

After entering bike select, press the L or R key to select Bike 1 or Bike 2. Press the M key to confirm and exit to the setup menu.

Set Date and Time

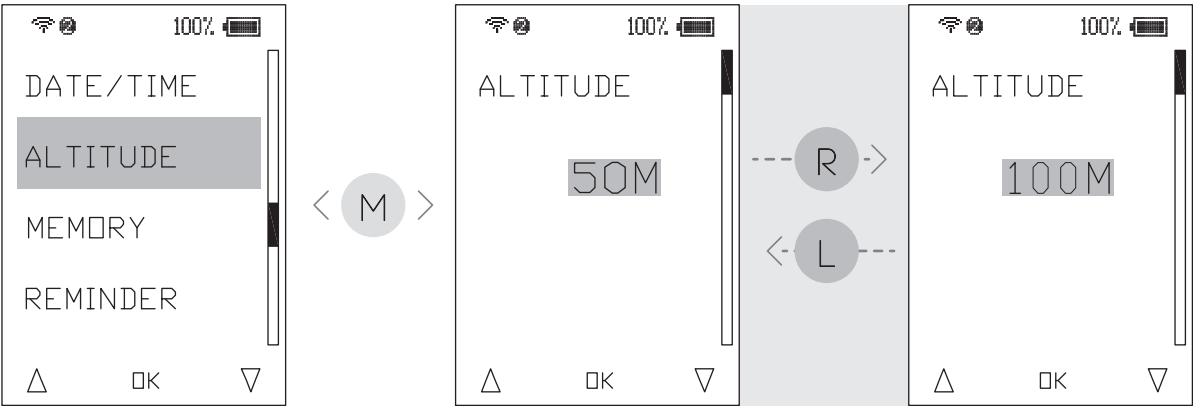

After entering the setup menu, press the L or R key to select date/time. Press the M key to confirm and move to date/time setup.

After entering date/time setup, press the L or R key to select the year. Press the M key to confirm. Press the L or R key to select the month. Press the M key to confirm. Press the L or R key to select the day. Press the M key to confirm. Proceed with settings of time format and time as outlined in their respective sections above. Press the M key to confirm and exit to the setup menu.

Altitude

After entering the setup menu, press the L or R key to select altitude. Press the M key to confirm and move to altitude setup.

After entering altitude setup, press the L or R key to select altitude. Press the M key to confirm and exit to the setup menu.

Memory

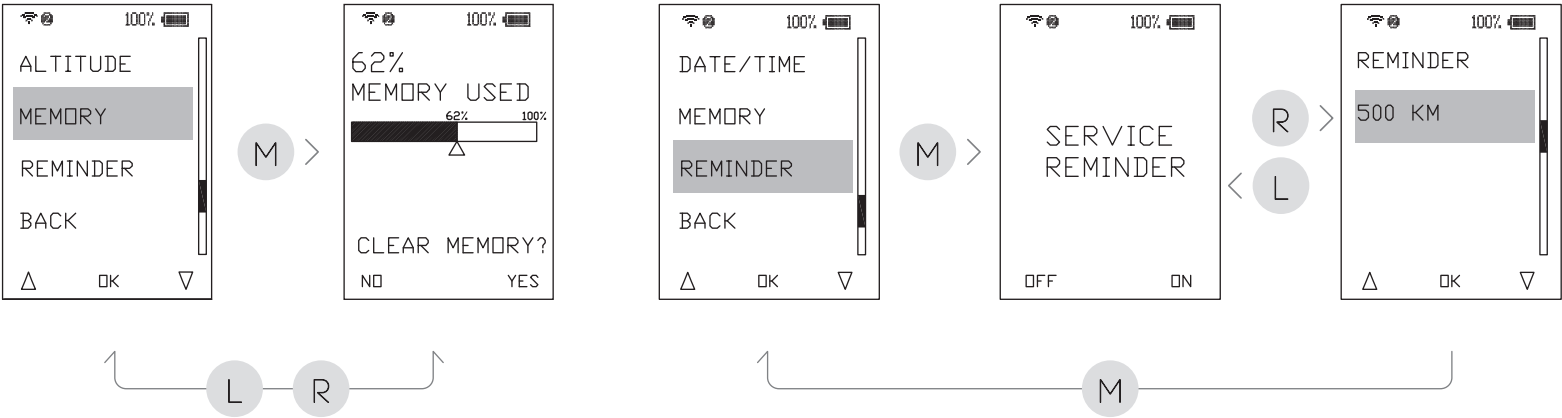

Service Reminder

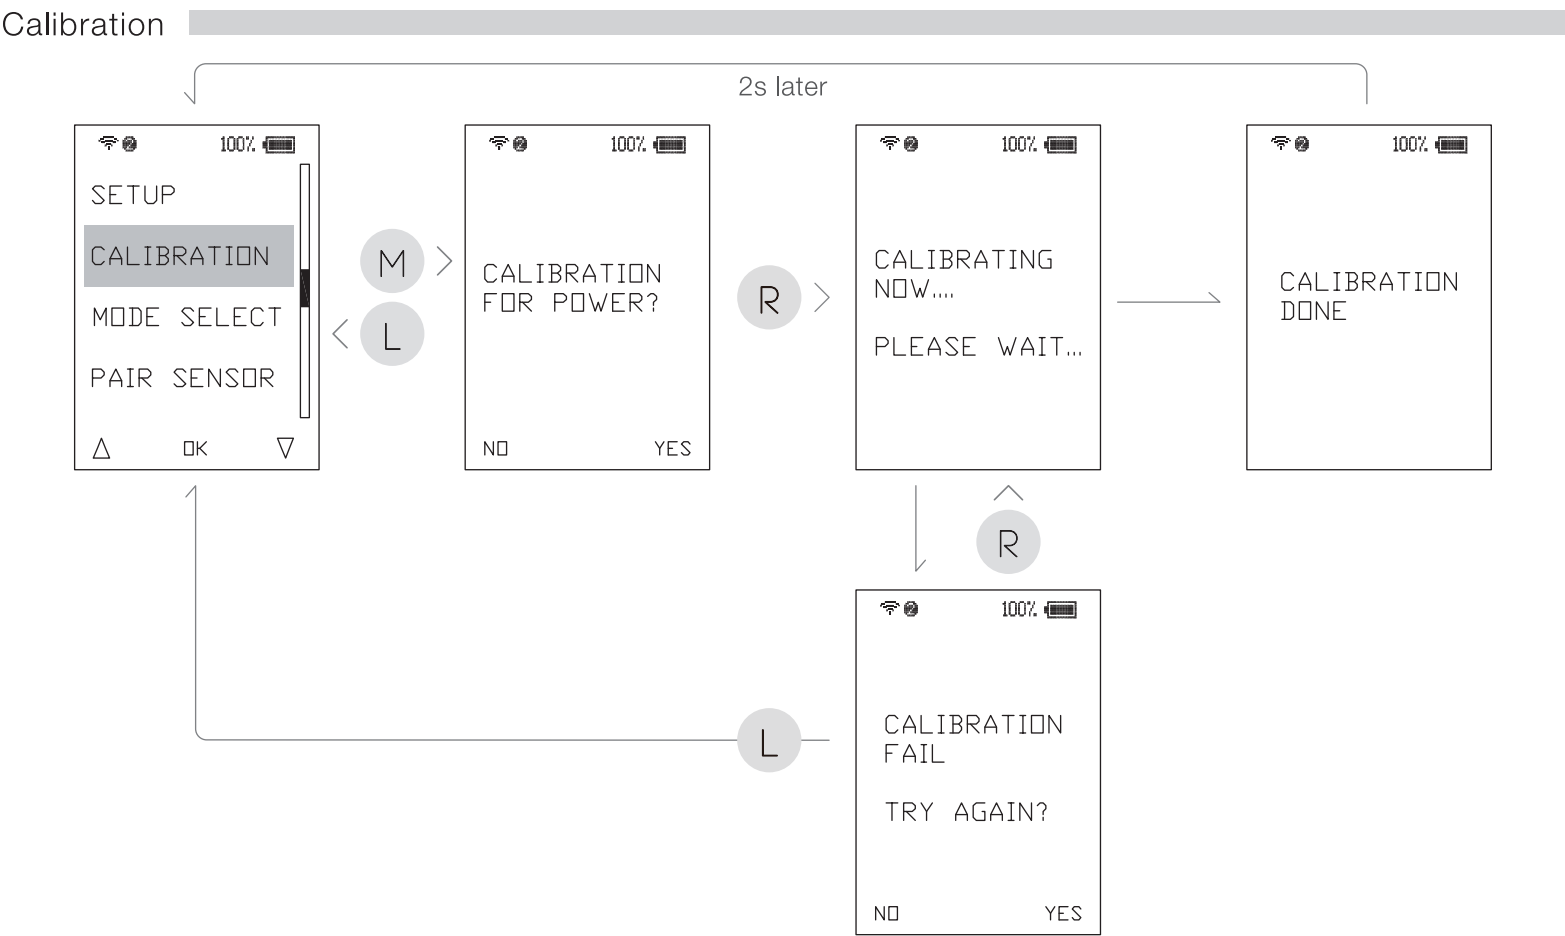

After entering the setup menu, press the L or R key to select memory. Press the M key to confirm and move to memory setup.

After entering memory setup, press the R key to erase data in memory. Press the L key to exit to the setup menu.

After entering the setup menu, press the L or R key to select reminder. Press the M key to confirm and move to service reminder setup.

After entering service reminder setup, press the R key to enable the reminder. Press the L key to disable the reminder. After enabling the reminder, press the L or R key to set the distance for the reminder from 300 to 700 km (180 To 430 miles). Press the M key to confirm and exit to the setup menu.

After entering the setup menu, press the L or R key to select calibration. Press the M key to confirm and move to calibration.

After entering calibration, press the R key to start power calibration or press the L key to exit to the setup menu.

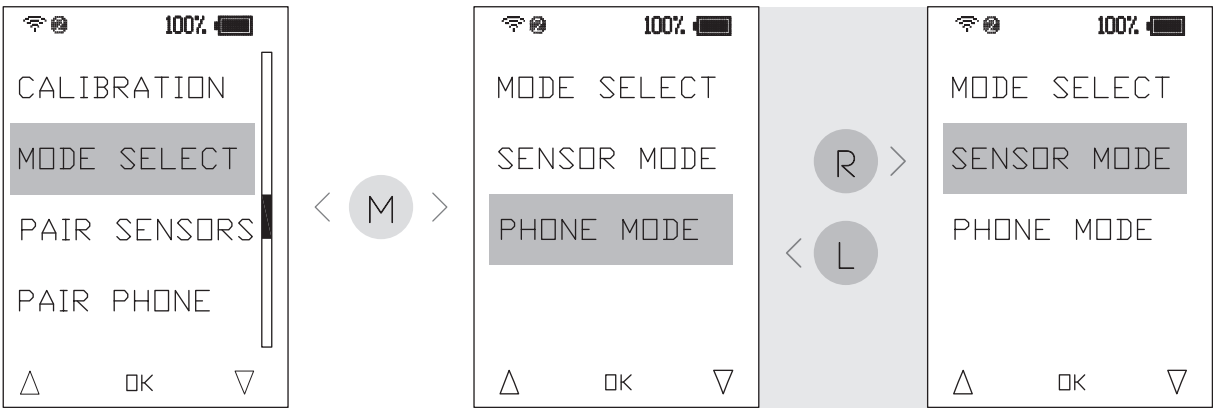

The computer will automatically exit to the setup menu 2 seconds after calibration is complete. If calibration fails, the computer will prompt you to try again.

Press the R key to calibrate again or press the L key to exit to the setup menu.

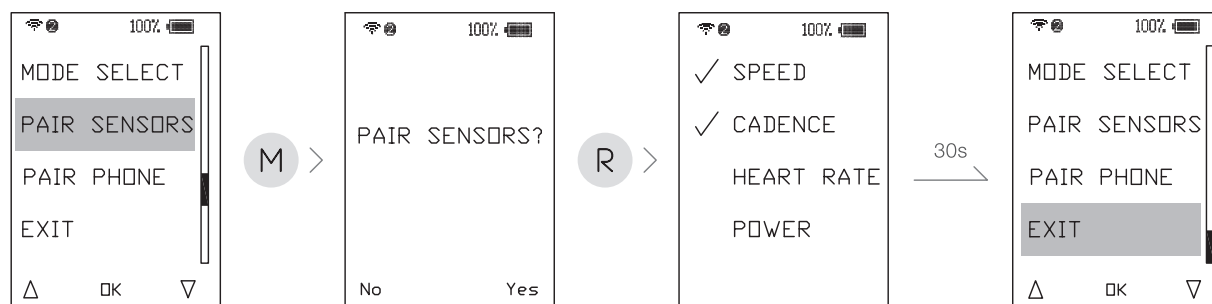

Select Mode

After entering the setup menu, press the L or R key to select mode select. Press the M key to confirm and move to mode select.

After entering mode select, press the L or R key to switch between sensor and phone modes. Press the M key to confirm and exit to the setup menu.

Sensor pairing

After entering the setup menu, press the L or R key to select pair sensors. Press the M key to confirm and move to pair sensors mode.

After entering pair sensors mode, press the R key to pair ANT+ devices including speed, cadence, heart rate, and power. After 30 seconds, the computer will enter pair phone mode. Or press the L key to skip pair sensor mode and enter pair phone mode.

After entering pair phone mode, press the R key to start pairing or press the L key to exit to the setup menu

For Bluetooth phone pairing, see App pairing process on P.27.
